Advisory: AA Highway detour at Maysville Thursday
Delays expected, motorists should consider alternate routes

FLEMINGSBURG, Ky. – Motorists are reminded that all AA Highway (KY 9) traffic will be detoured at Maysville tomorrow, Thursday, April 19, from 9 a.m. until later that evening. Travelers who plan to use the AA Highway should expect significant delays, and should consider alternate routes or changing travel plans.

The detour will utilize the Clyde T. Barbour Parkway (US 62) and Germantown Road (KY 3056) along these routes:

- Northbound AA Highway traffic (toward Cincinnati) will be reduced to one lane near milepoint 10 and exit onto US 62, then travel east on the Parkway about three miles before turning left onto KY 3056. Traffic will continue along KY 3056 approximately six miles before re-entering the AA Highway near milepoint 14 at Fernleaf.
- Southbound AA Highway traffic (from Cincinnati) will turn left near milepoint 14 at Fernleaf onto KY 3056. Traffic will continue along KY 3056 approximately six miles before using US 62 to return to the AA Highway. (Southbound traffic will be able to access local routes and destinations past the detour point, but will not be able to pass through the construction site.)
- Westbound US 62 traffic (from Ohio) that needs to access northbound AA Highway will need to turn right onto KY 3056 after crossing the William Harsha and following the KY 3056 detour.

The detour is required so contractors can safely install 130-foot long, 64-ton concrete bridge beams across the AA Highway for an overpass linking the Clyde T. Barbour Parkway with a new section of US 68 being built cross country as part of a \$21.5 million Kentucky Transportation Cabinet highway improvement project.
